Cycling

Cycling in the Vercors

Because of its variety of mountain rides, the Vercors is a true challenge for the cyclo-sportif cyclist. That's why the Vercors was chosen as one of the stages for the Tour de France 2004. One of the best advantages are the calm roads; hardly any traffic while cycling.

Diversity

Because of its central site Rencurel is the perfect base for many various rides. You can make a lot of trips without seeing the same every time.
